

WVU TECH

STEM Summer Academy for Girls

July 9-14, 2017

The **STEM Summer Academy for Girls** is a one-week summer program that shows you what STEM (Science, Technology, Engineering and Math) is really all about. You'll take classes in topics such as computer science, information systems, biology, chemistry, math and various disciplines in engineering. You'll also attend field trips, participate in projects and hear from female guest speakers who work in STEM professions.

At the Academy, you'll get a chance to experience what life is like on a college campus as you meet other students your age from around the state and participate in activities led by upper-class WVU Tech student counselors who are studying STEM fields.

So, if you're ready to have a great time and learn about fields that interest you, **apply by May 21, 2017 at wvutech.edu/girlsinstem.**
